VIBRATIONAL SPECTROSCOPY, VOL. 1 (1990/91)

AUTHOR INDEX

Alieva, E., see Antonova, K. 219
Allan, J.R.
—, Baillie, G.M., Gerrard, D.L. and Birnie, J.
Resonance Raman spectroscopy in the determination of the polyene sequence length and the amount of dehydrochlorination of a poly(vinyl chloride) sample containing nickel(II) maleate 97
Alley, E.G., see Kalasinsky, K.S. 41
Amano, H., see Hatta, A. 371
Ancelin, H.
—, Yarwood, J., Clint, J.H. and Willatt, A.J.
Fourier transform infrared spectroscopic studies on the formation of ultrathin polyimide films using Langmuir–Blodgett techniques 81
Ancelin, H., see Howarth, V.A. 29
Antonova, K.
—, Koprinarov, N., Spassov, L., Grigorov, G., Martev, I., Alieva, E., Kuzik, L., Yakovlev, V. and Zhizhin, G.
Fourier transform infrared and surface electromagnetic wave spectrometry of thin solid films used in radiometry 219

Baillie, G.M., see Allan, J.R. 97
Beck, A.
—, Dobos, S. and Guczi, L.
Influence of $Fe_3(CO)_{12}$ on the interaction of $Re_2(CO)_{10}$ with hydroxylated alumina surface 215
Beck, A., see Dobos, S. 211
Beckstead, H.D., see Neville, G.A. 287
Belov, S.P., see Papoušek, D. 167
Birnie, J., see Allan, J.R. 97
Booij, A.S., see Konings, R.J.M. 383
Bruni, P.
—, Conti, C., Giorgini, E. and Tosi, G.
Fourier transform infrared spectroscopy: complexes of aromatic amines with organic acceptors. Part III 347

Carlisle, G.O.
— and Crowder, G.A.
Vibrational analysis of 4,4-dimethyl-2-pentyne 389
Cassell, D.K., see Kalasinsky, K.S. 41
Chacon, A., see Otero, J.C. 395
Chauvin, Y., see Gilbert, B. 299
Chen, G., see Fina, L.J. 353
Clint, J.H., see Ancelin, H. 81
Conti, C., see Bruni, P. 347
Cordfunke, E.H.P., see Konings, R.J.M. 383
Crowder, G.A.
Vibrational analysis of 3-methylbut-1-yne and 3,3-dimethylbut-1-yne 317
Crowder, G.A., see Carlisle, G.O. 389

Dobos, S.
—, Beck, A., Guczi, L. and Vizi-Orosz, A.
Fourier transform infrared study of the photo-induced interaction of $Re_2(CO)_{10}$ with hydroxylated alumina surface 211
Dobos, S., see Beck, A. 215
Dressler, J., see Salzer, R. 363
Durig, J.R.
—, Whang, C.M. and Harlan, R.J.
Spectra and structure of organophosphorus compounds. XLVII. Infrared spectrum and normal coordinate calculations of ethylphosphine 19
Durig, J.R., see Kalasinsky, K.S. 41

Egyed, O.
Spectroscopic studies on β-cyclodextrin 225
Eickhoff, T.
—, Grosse, P. and Theiss, W.
Diffuse reflectance spectroscopy of powders 229
Einarsrud, M.-A.
—, Rytter, E. and Ystenes, M.
Experimental and theoretical spectra of stoichiometric complex ions in oxochloroaluminate melts 61
Etemad, S., see Kamarás, K. 273
Evenschor, M.
—, Grosse, P. and Theiss, W.
Optics of two-phase composites 173

Falk, M.
Infrared spectrometric determination of nitrate, nitrite and ammonium ions by means of matrix isolation in pressed alkali metal halide pellets 69
Fina, L.J.
— and Chen, G.
Quantitative depth profiling with Fourier transform infrared spectroscopy 353
Fogarasi, G., see Pulay, P. 159

Ganz, M.
—, Hartke, B., Kiefer, W., Kolba, E., Manz, J. and Strempel, J.
Continuum resonance Raman scattering in diatomic molecules: experiment and theory 119

Gerrard, D.L., see Allan, J.R. 97
Gilbert, B.
—, Chauvin, Y. and Guibard, I.
Investigation by Raman spectrometry of a new room-temperature organochloroaluminate molten salt 299
Giorgini, E., see Bruni, P. 347
Grigorov, G., see Antonova, K. 219
Grosse, P.
Conventional and unconventional infrared spectrometry and their quantitative interpretation 187
Grosse, P., see Eickhoff, T. 229
Grosse, P., see Evenschor, M. 173
Guczi, L., see Beck, A. 215
Guczi, L., see Dobos, S. 211
Guibard, I., see Gilbert, B. 299
Gutmann, V., see Linert, W. 199

Haaland, D.M.
—, Higgins, K.L. and Tallant, D.R.
Multivariate calibration of carbon Raman spectra for quantitative determination of peak temperature history 35
Handke, M.
—, Milosevic, M. and Harrick, N.J.
External reflection Fourier transform infrared spectroscopy: theory and experimental problems 251
Harlan, R.J., see Durig, J.R. 19
Harrick, N.J., see Handke, M. 251
Hartke, B., see Ganz, M. 119
Hatta, A.
—, Amano, H. and Suëtaka, W.
Electric field response of 5CB liquid crystal molecules in the electrode boundary region as probed by modulation infrared ATR spectroscopy 371
Herr, S.L., see Kamarás, K. 273
Higgins, K.L., see Haaland, D.M. 35
Hoffmann, A., see Schrader, B. 239
Howarth, V.A.
—, Petty, M.C., Ancelin, H. and Yarwood, J.
Structural characterization of phospholipid Langmuir–Blodgett multilayers containing valinomycin 29

Jalsovszky, G.
— and Varga, J.
Measurement of absorption coefficients in vapour-phase infrared spectra by means of gas chromatographic–infrared systems 223
Johnston, C.
In situ laser Raman microprobe spectroscopy of corroding iron electrode surfaces 87
Jordanov, B.
Polarization Fourier transform infrared spectroscopy 145

Kalasinsky, K.S.
—, Alley, E.G., Cassell, D.K. and Durig, J.R.
Vibrational frequency patterns for hydrogen-substituted degradation products of the pesticide mirex 41
Kamarás, K.
—, Herr, S.L., Porter, C.D., Tanner, D.B., Etemad, S. and Tarascon, J.-M.
Vibrational structure in the infrared reflectance spectra of the high-temperature superconductor $Bi_2Sr_2CaCu_2O_8$ 273
Kellner, R., see Taga, K. 125
Kiefer, W., see Ganz, M. 119
Klaeboe, P., see Salzer, R. 363
Kolba, E., see Ganz, M. 119
Konings, R.J.M.
—, Booij, A.S. and Cordfunke, E.H.P.
High-temperature vibration spectrum of CsOH vapour 383
Koprinarov, N., see Antonova, K. 219
Korte, E.H.
Infrared specular reflectance of weakly absorbing samples 179
Kulińska, K.
—, Sarzyńska, J. and Wiewiórowski, M.
Differences in the association abilities in aqueous solutions of cytidine, 2′-deoxycytidine and their phosphate salts studied by Fourier transform infrared spectroscopy 277
Kuzik, L., see Antonova, K. 219

Linert, W.
—, Gutmann, V. and Sotriffer, A.
Investigation of the solvation of trimethylchlorostannane using far-infrared spectroscopy 199
Lopez-Cantarero, E., see Otero, J.C. 395
Luinge, H.J.
Automated interpretation of vibrational spectra. Review 3
Lukovits, I.
Harmonic force field between the (0001) surface of graphite and adsorbed methane 135
Lutz, B., see Singelenberg, F. 311

Mantsch, H.H.
— and Wong, P.T.T.
Pressure tuning vibrational spectroscopy: applications to aqueous systems 151
Manz, J., see Ganz, M. 119
Marcos, J.I., see Otero, J.C. 395
Martev, I., see Antonova, K. 219
Milosevic, M., see Handke, M. 251
Moylan, C.R.
Closed-loop intracavity photoacoustic overtone spectroscopy 377

Nagamura, T., see Oyama, M. 329
Neville, G.A.
—, Beckstead, H.D. and Shurvell, H.F.
Fourier transform Raman and infrared study of nitrazepam, nimetazepam, clonazepam and flunitrazepam 287

Okazaki, S., see Oyama, M. 329
Otero, J.C.
—, Lopez-Cantarero, E., Chacon, A. and Marcos, J.I.

Vibrational spectrum of N,N'-dimethylethyleneurea-d_0 and -d_6 395
Oyama, M.
—, Okazaki, S. and Nagamura, T.
Selective measurement of resonance Raman and absorption spectra of different charged species produced in the electro-oxidation of N,N'-dimethyl-N,N'-diphenylbenzidine by means of a column electrolytic continuous-flow method 329

Papoušek, D.
—, Pracna, P., Tesař, R., Belov, S.P. and Tretyakov, M.Yu.
Submillimetrewave spectroscopy of the pure rotational transitions in the $v_6 = 1$ vibrational state of $^{12}CH_3F$ 167
Petty, M.C., see Howarth, V.A. 29
Petty, M.C., see Song, Y.P. 305
Porter, C.D., see Kamarás, K. 273
Pracna, P., see Papoušek, D. 167
Pulay, P.
—, Fogarasi, G., Zhou, X. and Taylor, P.W.
Ab initio prediction of vibrational spectra: a database approach 159

Roland, U., see Salzer, R. 363
Rytter, E., see Einarsrud, M.-A. 61

Salzer, R.
—, Dressler, J., Steinberg, K.-H., Roland, U., Winkler, H. and Klaeboe, P.
Fourier transform infrared (DRIFT) investigation of glass-covered samples. Study of hydrogen spillover on zeolites 363
Sárkány, J.
Effects of nitric oxide on carbon monoxide adsorbed on Pt/SiO_2: an infrared study 139
